

REFERENCE

2503-TYPE TELEPHONE SETS

1. GENERAL

1.01 This section contains identification and connection information for the 2503C (MD) and 2503CM (modular) (Fig. 1) telephone sets. Refer to Section 502-500-110 for common maintenance information for 0- and 1-button telephone sets.

1.02 This section is reissued to:

- Include 818645707 (P-86D570) faceplate assembly, Table A

2. IDENTIFICATION

2.01 The 2503-type telephone sets are desk sets intended for use in conjunction with other equipment to provide DATA-PHONE® data communications service.

2.02 **2503CM:** With the exclusion key nonoperated (normal position) this telephone set may be used with the J1D402B data set to provide data service with monitoring of computer-generated voice replies. With the exclusion key operated (up position) the set provides regular telephone service. To deactivate monitoring feature, refer to Fig. 3, Note 4.

2.03 **2503C:** With the exclusion key operated (up position) this telephone set may be used with the J1D402B data set to provide data service. With the exclusion key nonoperated (normal position) the set provides regular telephone service.

Note: The relationship of features to exclusion key differs in the 2503C and 2503CM telephone sets.

2.04 These telephone sets are used in Data Access Arrangements (DAA) where the customer-owned equipment is connected to the DDD network through a coupler. Fig. 2 and 3 provide connection information on the 2503C and 2503CM telephone

sets. The 2503CM is a modular set which is shipped with a G15A handset but without the H4DU handset cord or the D8AA mounting cord, **which must be ordered separately.**

2.05 For application of these telephone sets, refer to Division 590.

2.06 Table A lists replaceable components for these sets.

2.07 When a polarity guard is required with this set, install guard assembly (ordered separately) and connect as shown in Table B. Polarity guards should be installed only when authorized by local instructions to prevent battery and ground reversals encountered in end-to-end signaling installations.
